MY CONTRACT

As I go through the CareerHack Program, I hope to learn more about web development and career paths after the bootcamp.

Some challenges I may face are:
- Not having enough time for my family.
- Not having enough sleep.
- Learning a lot of new knowledge that sometime I'll feel overwhelmed.

To deal with these challenges I plan to:
- Prepare myself and my family to sacrifice time with family for some months.
- Stay strong and keep myself in good health.
- Stay positive and try my best to figure things out.

During the program, I commit to putting time aside for myself, because I want to achieve my goal of being an excellent web developer and having a good career.
